

Display Namespace Reference

Access display state and operations via scripts.

[Reference](#) [Code](#) [Namespaces](#) [Alarm](#) | [Client](#) | [Dataset](#) | [Device](#) | **Display** | [Historian](#) | [Info](#) | [Report](#) | [Script](#) | [Security](#) | [Server](#)

The **Display Namespace** exposes runtime display state to .NET scripts. Use **@Display** to reference the namespace, followed by the accessors listed below.

[Display Members](#)

Display Members

Direct properties and methods on @Display.

Member	Kind	Type	Description
logOn	Property	Display	Page activated by the Security LogOn menu on Rich Clients
mainPage	Property	Display	Solution home page (shows in Preview images)
selectPage	Property	Display	Page activated by the File Open menu on Rich Clients

Member set auto-generated from RuntimeNamespace.json (build fx-10.1.5.2000, schema 1.0, generated 2026-05-17T21:29:31.4885315 Z). For the full .NET API surface see the external [Display Namespace .NET API Reference](#).
